

Product Release Notes

November & December 2023

Release Notes

Summary

This release cycle includes new features and improvements to the software deployed within the period;

- Thursday 19th October 2023 → Monday 18th December 2023

During this period, we have focused on implementing various requests for enhancements whilst providing significant improvements to enhance the overall performance and user experience.

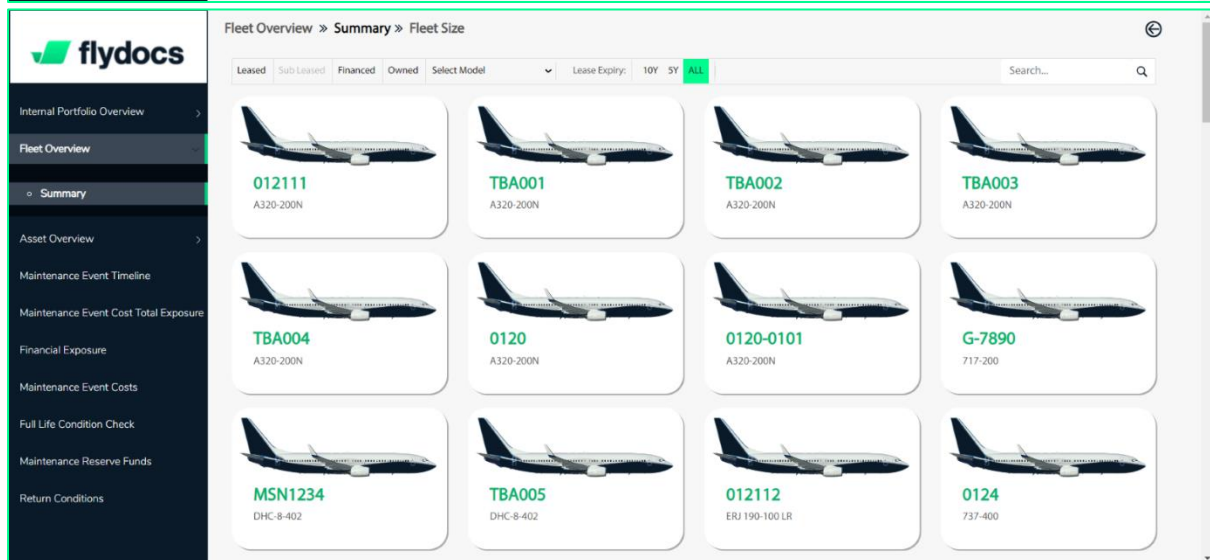

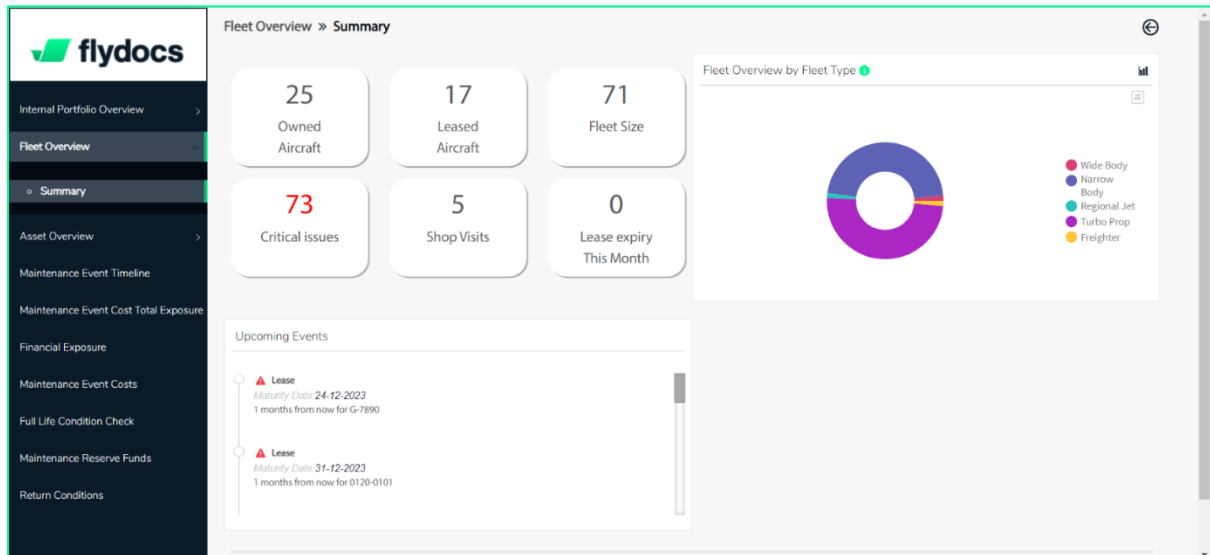

Abbreviations

A&E	Access & Entitlements
LAM	Lifecycle Asset Management
COMP	Compliance
FCI	Flydocs Integrations
FSCC	Flydocs Scanning Control Centre
RSP	Records Storage Project

Release Notes:

- Fleet Overview - Fleet view of all Assets highlighting Return Conditions showing Potential Risk (LAM)**

Description: A new interface has been designed to provide users with a holistic view of their fleet, alongside key aircraft data.

- **Flydocs Help Centre Integration for Compilation System Notification (RSP)**

Description: We have configured a new Flydocs Help Centre link for the Compilation System Notification under the FAQ section. Previously utilizing HubSpot, this enhancement provides users with a streamlined access point for post-compilation information.

- **Compilation Functionality - Merge MH Indexed Files (RSP)**

Description: Introducing a new functionality in Compilation to merge MH indexed files based on MCC rows order. The 'MH indexed files Compilation' label includes an option to 'Merge and Order by MCC Rows' with a checkbox. By default, this option is unticked. Users can enable it during compilation to merge files based on MCC rows order in the MH section. The functionality is specifically designed for users selecting merged PDFs, giving them the choice to enable or disable the function. If not selected, the current compilation function remains available.

- **M-archive UAT - Automated Engine Creation and migration(RSP)**

Description: In M-archive UAT, we have enhanced the system to support automated engine creation using CSV2 information. Where date can be migrated in a much effective way by means of automation.

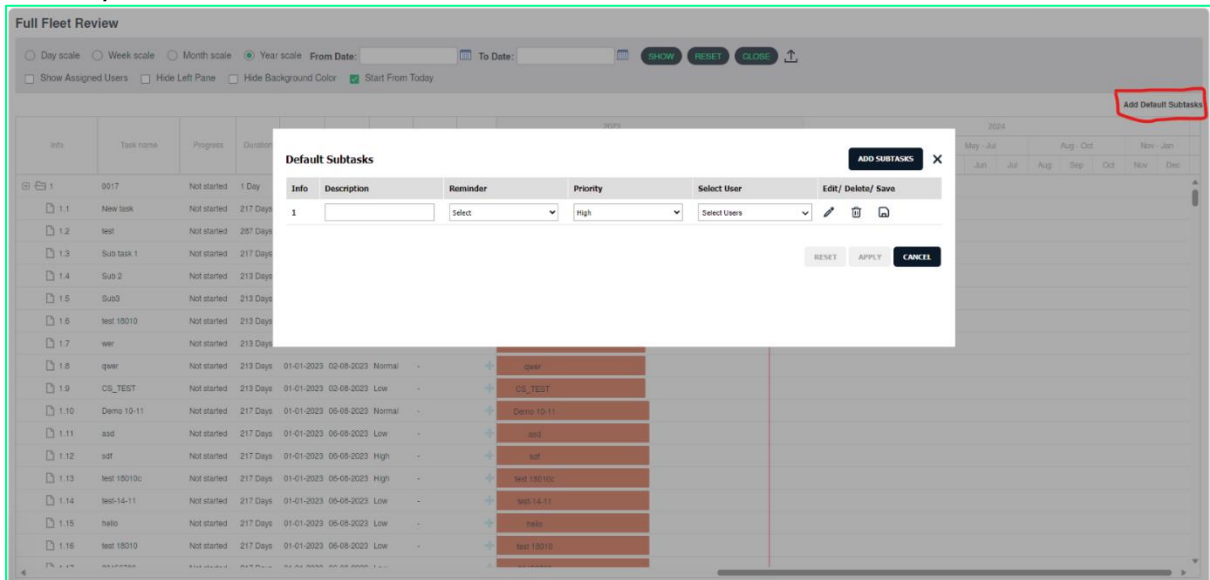

- **API Enhancement: Support for ".CSV" File Format in SFTP Folder (FCI)**

Description: This enhancement introduces support for the ".CSV" file format in the API across all clients and platforms. Users can now seamlessly process ".CSV" files from the SFTP folder to feed the path service support.

- **Ability to apply subtasks under each main task in ARC Planner(COMP).**

Description: In Project Management >> Planning Control Centre >> Airworthiness Review Planner area, we have introduced new option to add default subtasks under each main task in ARC Planner.

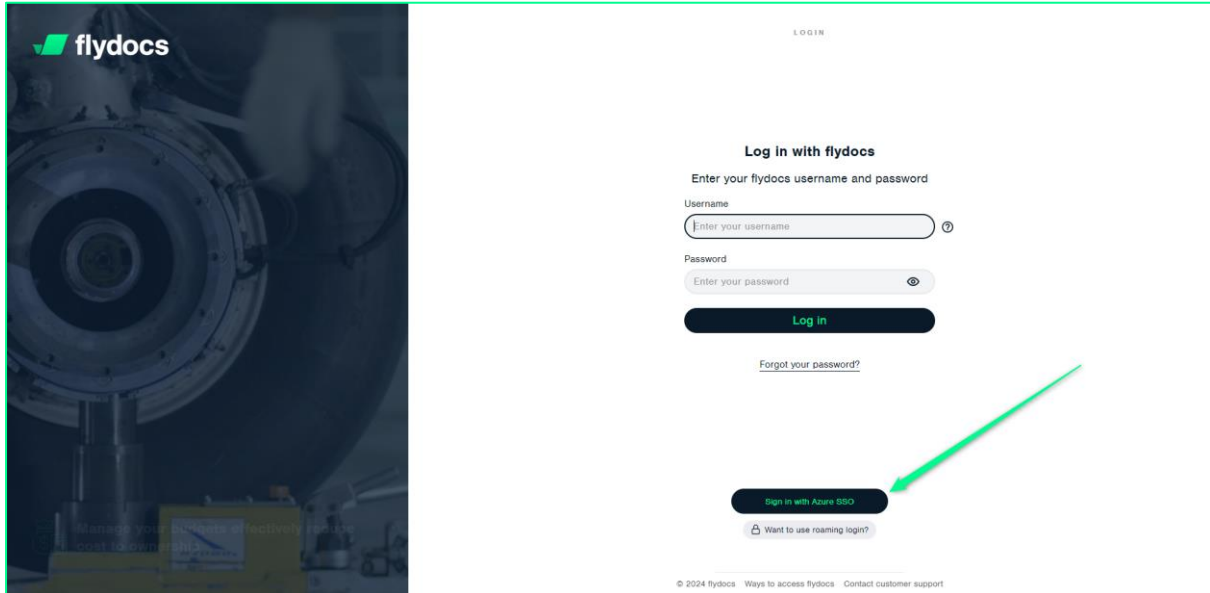

How to use: Navigate to Project Management >> Planning Control Centre >> Airworthiness Review Planner >> Full Fleet Review area and click on the below highlighted option i.e. Add Default Subtasks, it will open a pop-up window which will allow you to Add, Edit or Delete the subtasks. You can then apply the newly added subtasks to the main task in the Full Fleet Review planner.

- **Introduced another login method i.e Azure SSO login via SAML configuration (COMP).**

Description: In flydocs login page, we have introduced new login option as "Sign in with Azure SSO".

Now, with just one click after verification, registered users can access the flydocs platform more quickly and easily if their organisation has an Azure SAML configuration set up with flydocs and has an SSO account.

- **December Release Notes**

These are due to be circulated w/c 12th February 2024.
