Did you know you can see the backlog of release notes on our help pages? [Find them here.](#)

December 2024 & January 2025 release notes:

These are due to be circulated w/c 3 February 2025.

Feedback

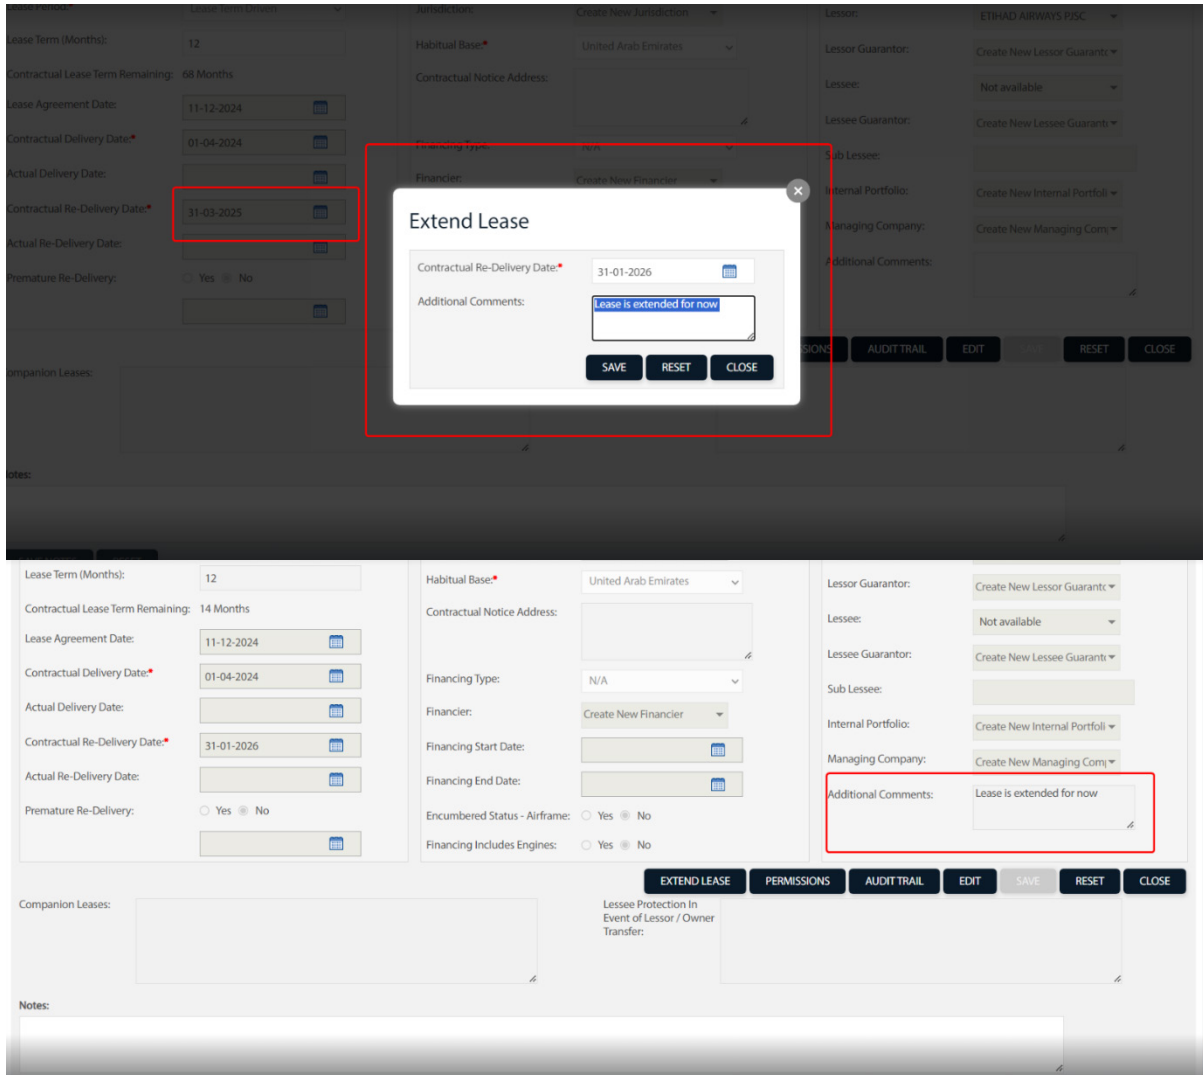

We'd love your feedback. Take just five minutes to let us know how we can make these communications as useful to you as possible. [Take the short survey.](#)

Questions

If you have any questions about these release notes, please don't hesitate to contact flydocssupport@flydocs.aero or reach out to your CSM.

Ability to extend Lease end date

Description: As a user, I can use the **Lease Extension** option to extend my lease within the notice period so that any renewed lease would have updated information in LAM

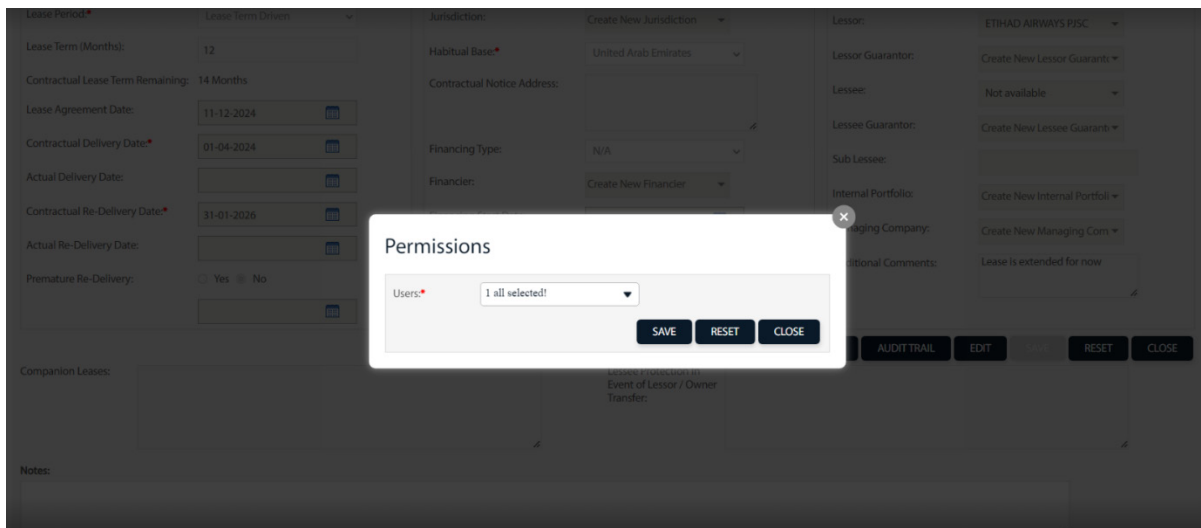

Maintenance Event Timeline: add optimal scenario along with operational days

Description: The Maintenance Event Timeline has been enhanced to include optimal scenarios concerning operational days, so that users can decide on when to perform the maintenance events, reducing downtime whilst allowing for fleet optimisation.

Scenario A					Scenario B				
Asset	Year (In days)	Downtime (In days)	Total Event (In Days)	Operational Days	Asset	Year (In days)	Downtime (In days)	Total Event (In Days)	Operational Days
Airframe S/No. TBA001	1825	0	2 (0)	1825	Airframe S/No. TBA001	1825	60	3 (180)	1645
Engine S/No. TBA003	1825	0	0 (0)	1825	Engine S/No. TBA003	1825	0	0 (0)	1825
Engine S/No. TBA004	1825	0	12 (0)	1825	Engine S/No. TBA004	1825	0	9 (0)	1825
APU S/No. TBA002	1825	60	2 (120)	1705	APU S/No. TBA002	1825	0	0 (0)	1825
Thrust Reverser S/No. TBA008	1825	0	1 (0)	1825	Thrust Reverser S/No. TBA008	1825	0	1 (0)	1825

Enhanced access control

Description: As a user, I am able to control who has access for each lease so that only the concerned person can see the lease contract details.

Opening multiple documents in separate windows without reload

Description: Auditors can now open multiple documents in separate modules (MCC, MH, CS, Boxsearch, Goods In, etc.) without page reload, making it easier to view and interact with multiple documents simultaneously without losing progress or opening separate windows.

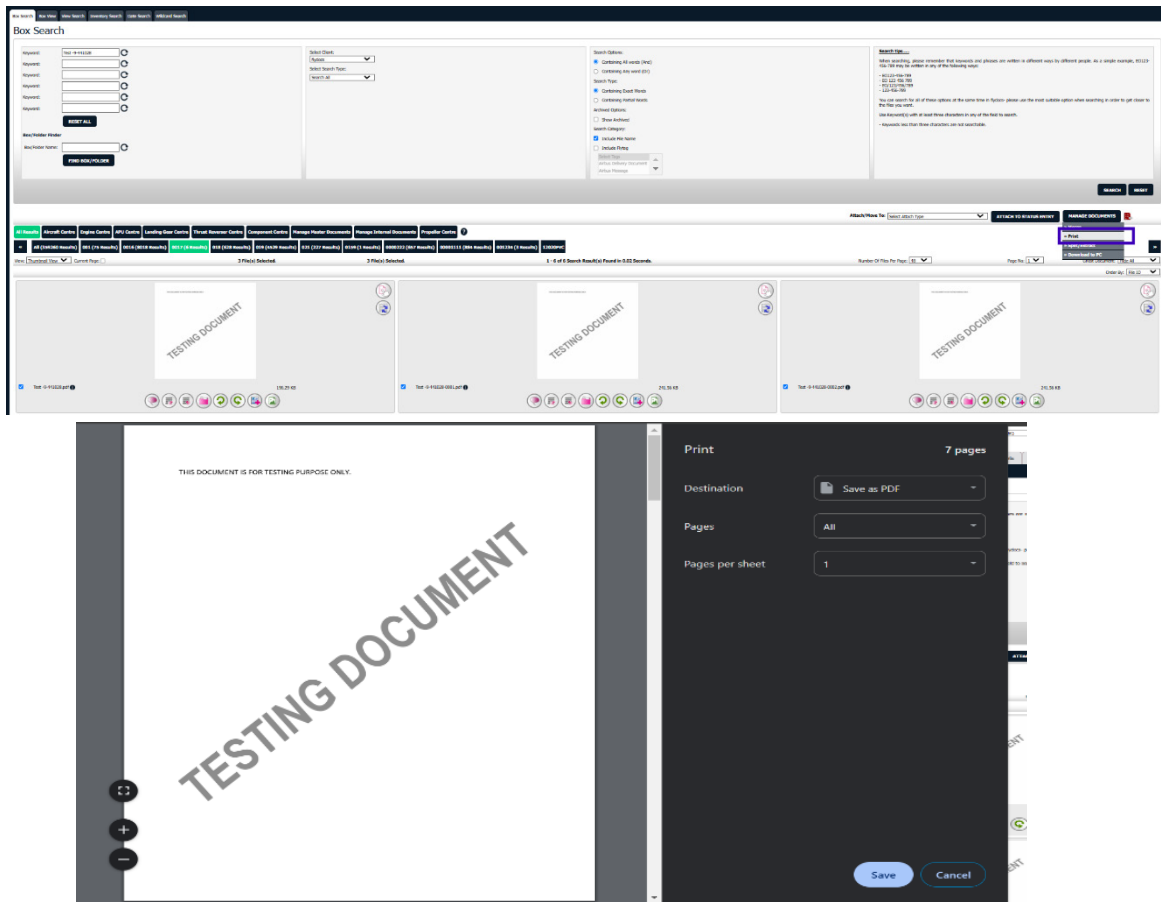

Now, users can open multiple documents at the same time, instead of having one single document viewer window that it is reloaded when a new document is opened. This change has been made available in the modules Maintenance History, Current Status, Maintenance Control Centre, Box Search and Goods In, allowing the verification process to be faster and more efficient.

Print option in box search

Description: As a user, I want to print some of the documents just by box searching them on platform so that I could easily use in auditing or binder preparation.

UI: Search>> Manage Documents >> Print

Here, after selecting multiple documents, click on print option. The below pop up will appear where you select require options and save.

END
